Conférences : le mercredi 15 octobre 2008 - Tour & Taxis (Bruxelles)

Titel van de presentatie / Titre de la présentation: Impact of Web 2.0 on the SDI model

Spreker / Orateur: Dirk Frigne
CEO
DFC Software Engineering
Brugsesteenweg 587
9030 Gent

Samenvatting van de presentatie / Résumé de la présentation:

In the world of Geo-ICT the authentic data sources play a vital role. Mutual exchanging and adapting information between these data sources are one of the cornerstones of what one call the "Spatial Data Infrastructure" (SDI), or in other words the geographical information highway. This presentation describes the technical architecture of a world wide community driven platform and explains by means of case studies in the field why it can be used as best practice for a cross-border SDI node.
